Professional Summary

- 15+ years of experience as a Senior Backend Developer specializing in PHP, Laravel, Symfony, and high-performance WordPress.
- Core contributor to a WordPress security plugin with 1M+ active installations ([Limit Login Attempts Reloaded](#)).
- Led the full migration of a legacy SaaS application (TestRail) from PHP 7 to PHP 8, ensuring a seamless rollout.
- Speaker at WordCamp Sofia 2024, demonstrating active community leadership and expertise.

Key Skills

PHP | Laravel | Symfony | WordPress | JavaScript | TypeScript | Python |
ReactJS | MySQL | Redis | Docker | CI/CD | REST API | OpenAI API | Git

Professional Experience

edited.com — Senior Backend Developer / Senior WordPress Developer

Sep 2023 - Nov 2025 | UK/Bulgaria

One of the largest B2B fashion intelligence portals.

- Architected and delivered custom WordPress plugins with HubSpot, GTM, and Pendo integrations, enabling the marketing team to launch automated campaigns and track user funnels.
- Implemented a full end-to-end test suite using Playwright, slashing manual QA effort before releases and reducing critical regressions.
- Replaced the default site search with an AI-powered SearchWP solution, improving content discovery and leading to a measurable lift in user engagement with search results.
- Established the company's first CI/CD pipeline for WordPress projects, automating deployments and standardizing code quality across the team.
- Integrated the OpenAI API to build a content summarization feature, providing a key differentiator for the platform's premium offering.

Dev Tactics — Senior Backend Developer

Feb 2022 - Sep 2023 | Poland/Germany/USA

- Led the full migration of TestRail, a legacy Test Management Tool, from PHP 7 to PHP 8, including code audit, refactoring, compatibility validation, and rollout.
- Redesigned and implemented REST API v3 for APILayer, documenting it with OpenAPI (Swagger) to reduce onboarding friction for integration partners.
- Built and maintained data-collection integrations for ZenScape across search, maps, and stock data sources within a microservices architecture (Laravel, Symfony, Flask).
- Refactored critical modules in legacy services, decreasing bug volume and simplifying onboarding for new developers.

New Statesman Media Group — Senior Backend Developer

Jun 2020 - Feb 2022 | UK/Bulgaria

Publisher of newstatesman.com, one of the largest and oldest newspapers and media portals in the UK.

- Developed and maintained high-traffic WordPress properties on LAMP stack, focusing on performance and scalability.
- Built a custom WordPress plugin for in-article polls with BigQuery integration for analytics and reporting.
- Created a content-targeting plugin (PHP/TypeScript) integrated with Permutive.io to support personalized ad campaigns.

- Mentored 2 junior engineers through code reviews and pair programming, supporting their growth to Mid-level roles within 18 months.

Founder & Lead Developer — nikita.global (Freelance)

Mar 2009 - 2020

Delivered end-to-end solutions for international clients (including Upwork and Toptal), with a focus on custom WordPress development, e-commerce integrations, and legacy modernization.

- **High-load media project:** Architected and scaled a WordPress platform for a rap magazine with traffic peaks around 1M monthly visitors.
- **E-commerce integrations:** Developed custom WooCommerce payment and warehouse integrations, including marketplace-related workflows (AliExpress, eBay).
- **Mobile product backend:** Built backend services and REST APIs (Laravel, PHP) for a React Native baby-monitoring app, supporting features that led to a 4.5-star app-store rating.

Education

- **MBA in Marketing** — Cardiff Metropolitan University of Wales, UK (2012)
- **French Language Course** — Institut International de Langues & Affaires, Rambouillet, France

Certifications

- **PHP Developer, Professional** — Otus (2023)
- **Advanced PHP** — Udemy (2020)

Community

- WordCamp Sofia 2024 speaker, WordPress plugin developer, and translator — [WordPress profile](#)
- Contributor to [Limit Login Attempts Reloaded](#) (1M+ active installations)
- Contributor to [Disable AI for Security](#)
- Creator of ViK Bot, a Telegram bot that warns about planned water outages in Bulgarian cities (since 2019)
